URBAN STORIES

Photo: Courtesy of Fundación Casa de la Infancia
Stories can be disseminated throughout the urban environment as murals, art installations and sculptures.

Apart from a beautification effect, they have potential to trigger learning and curiosity in young children and can be used to foster interactions with caregivers.

Every place has its stories, so it also contributes to strengthening a community and can be adapted to any context.

**At a glance...**

**COST**

$  $$  $$$
